

New frontiers in drug development

(Coordination: Prof. João José Sousa)

Date	Professor	Topic
3 de Março <u>14.00 – 18.00</u>	Professora Doutora Eliana Souto	Nanoproduction and up-scalable technology of biodegradable drug delivery systems
Dia 10 de Março <u>14.00 – 16.00</u> <u>16.00 – 18.00</u>	Professora Doutora Carla Vitorino Professora Doutora Rita Figueiras	Skin permeation: opportunities and challenges Polymeric micelles: definition, structure and applications
Dia 17 de Março <u>14.00 – 16.00</u> <u>16.00 – 18.00</u>	Professor Doutor João Canotilho Professor Doutor Rui Carvalho	Materials's Identification and characterization Analytical procedures used for active substance characterization
Dia 24 de Março <u>14.00 – 18.00</u>	Professor Doutor António Ribeiro	Micro and nanoencapsulation using biopolymers
Dia 31 de Março <u>14.00 – 18.00</u>	Professora Doutora Olga Borges	Nanotechnology applied on new vaccines development
Dia 07 de Abril <u>14.00 – 16.00</u> <u>16.00 – 18.00</u>	Doutora Marisa Gaspar Professora Doutora Eugénia Pina	Pulmonary administration Polymeric materials used in the development of sustained release formulations
