

BIOSKETCH

José M. Cuezva received his undergraduate degree in Biology from the Universidad del País Vasco (Spain) and his PhD degree from the Universidad Autónoma de Madrid in 1978. Following a two-year postdoctoral training period at the School of Medicine, Case Western Reserve University in Cleveland, Ohio, he was appointed Associate Professor of Biochemistry and Molecular Biology at the Centro de Biología Molecular “Severo Ochoa” (CBMSO) from the Universidad Autónoma de Madrid (UAM). In 1997 he became Full Professor of Biochemistry and Molecular Biology at the CBMSO-UAM. In 2001, he spent a sabbatical period at the Burham Institute in La Jolla, California, to continue his investigation in mitochondrial dysfunction in cancer. In 2006, he was appointed group leader of the CIBER of Rare Diseases from the Instituto de Salud Carlos III. His current research interests include the characterization of the mechanisms that regulate the biogenesis and functional differentiation of mitochondria as well as organelle dysfunction in cancer and rare diseases.
