Sergei Kovalenko, PhD

Head of the Genetic Engineering Lab

Institute of Molecular Biology and Biophysics

630117, Novosibirsk, Russia

Sergei Kovalenko was educated in Novosibirsk State University as Molecular Biologist, Ph. D. in 1990. Nowadays he is a lecturer in Novosibirsk State University (Molecular Medical Genetics course) and Head of the Laboratory in the Institute of Molecular Biology and Biophysics, Novosibirsk.

His current interest connected with Molecular Oncology – mutations in genes connected with familial cancer, analysis of chromosomal abnormality in cancer cells, development of various assay for SNP and cancer-related mutation detection.
