

View of Coimbra old town

### KEY NOTE SPEAKERS

- **Professor Evelyne van Ruymbeke** (Université Catholique de Louvain, Belgium)
- **Professor Manfred Wagner** (TU Berlin, Germany)
- **Professor Philippe Coussot** (Université Paris-Est, France)

### ORGANIZING COMMITTEE

- Abel Ferreira** (University of Coimbra and CIEPQPF-UC)
- Fátima Barreiros** (Polytechnic Institute of Leiria and CEMUC-UC)
- Hermínio Sousa** (University of Coimbra and CIEPQPF-UC)
- Maria Graça Rasteiro (Chair)** (University of Coimbra and CIEPQPF-UC)
- Maria Teresa Cidade** (New University of Lisbon and President of SPR)

### SCIENTIFIC COMMITTEE

- Antxon Santamaria** (University of the Basque Country, Spain)
- Bob Powell** (Davis University, USA)
- David Harbottle** (Leeds University, UK)
- Filipe Antunes** (University of Coimbra, Portugal)
- Francisco Rubio Hernandez** (University of Malaga, Spain)
- Isabel Sousa** (University of Lisbon, Portugal)
- José Covas** (University of Minho, Portugal)
- José Maria Franco** (University of Huelva, Spain)
- José Muñoz Garcia** (University of Seville, Spain)
- Juha Salmela** (VTT, Finland)
- Maria Graça Rasteiro** (University of Coimbra, Portugal)
- Maria Teresa Cidade** (New University of Lisbon and President of SPR, Portugal)
- Miguel Nóbrega** (University of Minho, Portugal)

## IBEREO 2015

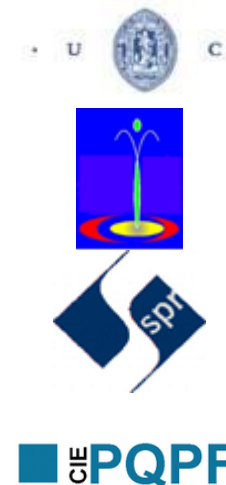

### Challenges in rheology and product development

Coimbra, Portugal, 7-9 September 2015

**CALL for ABSTRACTS now open:**

<https://easychair.org/conferences/?conf=ibereo15>

**Conference Venue: Engineering Campus of FCTUC, Chemical Engineering Department**

**Rua Sílvio Lima, University Coimbra - Pólo II  
3030-790 Coimbra**

### ***Overview***

Following the previous successful Iberian Rheology Conferences (2004, 2008, 2011 and 2013), organized jointly by the Portuguese Society of Rheology (SPR) and Spanish Group of Rheology (GER), IBEREO 2015 will take place in Coimbra, Portugal, in the premises of the prestigious University of Coimbra, well known by its history of over 700 years, but also by recent contributions to modern science, namely through its Faculty of Science & Technology (FCTUC).

The conference will be held in the Engineering Campus of FCTUC located by the river Mondego.

The conference will address the most recent trends in rheology, from experimental techniques to modeling and simulation, focusing on a variety of applications and stressing the importance of rheology for the development of new products.

The conference is open to the participation of international specialist in the field of rheology. A reputed range of keynote speakers will lead us to update knowledge in the field of the conference becoming aware of the most recent developments and tendencies in this field. We aim at creating, with this meeting, the opportunity for exchange of scientific experience among participants. State of the art rheological techniques and related equipment will be available in different stands.

### ***Conference topics***

- **Experimental methods**
- **Modelling and simulation in rheology**
- **Multiphase systems and composites**
- **Product formulation**
- **Interface rheology**
- **Micro-rheology and micro-fluidics**
- **Applications (Polymers, biopolymers and biomaterials, biofuels, food, cosmetics, pharmaceuticals and health products among others)**
- **New trends in rheology**

### ***Important dates***

- **Abstract Submission:** February 28th 2015
- **Notification of acceptance:** April 15th 2015
- **Submission of manuscripts:** May 15th 2015
- **Notification of final acceptance:** June 15th 2015
- **Earlybird registration:** July 15th 2015
