We seek to recruit

1 Senior Scientific Director
2 Group Leaders (junior, midcareer or senior level)

The newly founded Research Institute of Excellence, MIA-Portugal will hire a Senior Scientific Director and 8 new Group Leaders that will focus on different aspects of the basic research on Ageing or related mechanisms, and work in a new building that hosts MIA-Portugal laboratories, close to the University Hospital and the Faculty of Medicine and physically linked to imaging facilities, as well as animal facilities.

We offer a possibility to a tenured track position at the University of Coimbra and an interesting start-up packages and state-of-the-art laboratories and infrastructures focusing on any topic related to the Molecular and Biological Basis of Ageing.

The Senior Scientific Director should have an outstanding scientific performance, coordination experience, international networks.

For the Group Leaders the start-up packages include 3 post-docs and one technician to constitute each team. We expect candidates to develop a competitive, independent research program in his/her respective field, local collaboration and integration into the Coimbra biomedical community. Applicants should hold a PhD or MD/PhD degree, with a record of outstanding research potential.

Candidates should submit a pre-application (1st round) until the April 25, 2020 by sending to miacareers@uc.pt the following documents/information:

- a complete CV
- a description of research interests and relevance to the field of ageing (achievements and projects, max 5 pages)
- name and contact of three references who will be independently asked to provide support letters.

The 2nd round application will be on May 2020 - Interview: June 2020.

MIA-Portugal is a newly founded Research Institute of Excellence, funded by the European Commission, University of Coimbra and local government, in partnership with Univ. Newcastle, Univ. Medical Center Groningen, Mayo Clinics and Univ. Copenhagen.

MIA-Portugal is imbedded at the University of Coimbra integrated in an exciting international environment bridging the largest and most productive research Center in Neuroscience and Cell Biology in Portugal (CNC) and the University Hospital of Coimbra (CHUC, the largest in the country), tightly linked to two European-awarded biotech parks (IPN and BIOCANT), forming the largest hub of biomedical research in Portugal.
