

GeoPlaNet

GeoPlaNet – Erasmus Mundus Joint Master Programme in Planetary Geosciences

*Train by research the next generation of planetary
scientists and experts in space missions*

- Join a world competitive European learning experience
- Learn to design, analyse and interpret the data of the future space missions
- Develop research skills and numerical tools, use VR and collaborative virtual universes for space exploration
- Experience a research internship in a network of space exploration centers and academies including ESA and NASA
